

The SOARNet Sentinel

Medical Student Investigators Key to SOARNet's Success

Michael Dressing and Michael Perry at the 2014 Boonshoft School of Medicine Medical Student Research Symposium on April 10, 2014.

Meredith Pesce discussing partnership with a conference attendee at the 2014 Pediatric Academic Societies and Asian Society for Pediatric Research

The faculty and students of the Division of Community Pediatrics and the community pediatrician members of SOARNet are actively involved in original research and the dissemination of research findings. Much of our work could not be accomplished without medical students. Students are part of the team that recruits and surveys parents and are active participants in the analysis and presentation of the data. The following is a brief biography of some of our recent student investigators.

Nicoletta Frankenstein, M.S., is a fourth year medical student at the Boonshoft School of Medicine at Wright State University. Nicoletta participated in the development of a mental health referral survey since its inception and will continue involvement during the survey's implementation. Nicoletta initially became involved in SOARNet because she wanted to continue doing research outside of her master's work.

Meredith Pesce, M.D., now a pediatric resident at NYP Hospital – Columbia Medical Center in New York, has been participating in general pediatrics and SOARNet research since the fall of 2013. Dr. Pesce began her Student Initiated Elective during the early stages of development of the Parent Pediatrician Partnership Scale (PPPS). She has been an active participant in many aspects of partnership research, including administering interviews to parents, interpreting data, and presenting posters.

San Diego, California

Southwestern Ohio Ambulatory Research Network

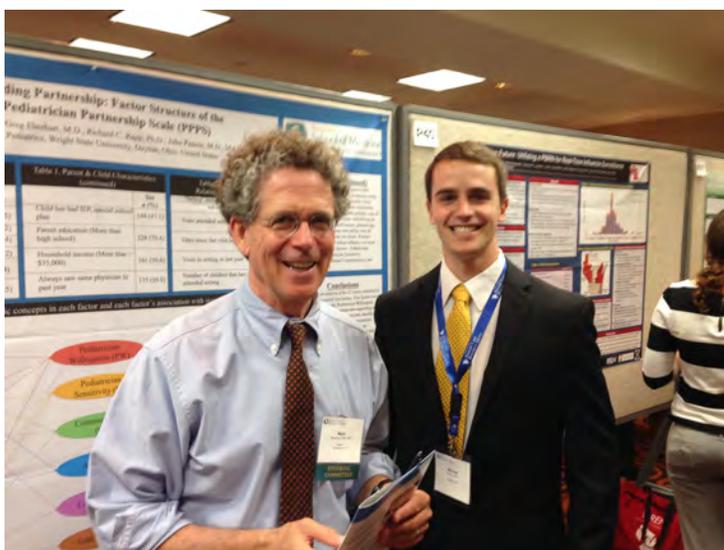

Michael Perry, M.D., now a pediatric resident at Nationwide Children’s Hospital in Columbus, Ohio, has been participating in general pediatrics and SOARNet research since fall, 2013. Dr. Perry expressed his excitement that SOARNet encouraged medical students to be full collaborators in research studies. He has been an active investigator in many aspects of partnership research, including administering interviews to parents, interpreting data, and presenting posters.

Michael Dressing is a fourth year medical student at the Boonshoft School of Medicine at Wright State University. Michael comes from Cincinnati and attended the University of Notre Dame as biological sciences major. He has studied abroad in Australia and traveled on a medical mission trip to Jamaica. Michael began his participation with general pediatrics and SOARNet research in summer, 2013. Michael has presented a poster on partnership at the 2014 Boonshoft School of Medicine Medical Student Research Symposium and travelled to Bethesda, MD to present another poster at the National Practice Based Research Network Conference.

Michael Perry and Meredith Pesce attended the 2014 Pediatric Academic Societies and Asian Society for Pediatric Research Joint Meeting in Vancouver, Canada, May 3 – May 6, 2014.

SOARNet Presents at National PBRN Meeting

Michael Dressing discusses his Partnership poster with Dr. Greg Eberhart (Director of PROS – Pediatric Research in Office Settings, American Academy of Pediatrics)

Dr. Greg Eberhart and Michael Dressing between meetings in Washington, D.C.

Dr. Pascoe To Chair National Library of Medicine Committee

John M. Pascoe, MD, MPH has been named Chair of the Literature Selection Technical Review Committee (LSTRC) of the National Library of Medicine for 2014-15, the final year of his 4-year term of service on the Committee. Dr. Pascoe is Professor of Pediatrics and Chief, Division of General / Community Pediatrics at the Wright State University Boonshoft School of Medicine, Dayton, Ohio and Co-Director of SOARNet.

The National Institutes of Health ensures representation of women and minorities, diverse representation in member expertise, as well as broad representation of members from different geographic regions of the United States. Members of NIH's scientific and technical peer review committees are selected based on their expertise in the particular scientific areas for which a committee has review responsibilities. Assessment of this competence for LSTRC is based on the quality of clinical and research accomplishments, publications in scientific journals, and other significant medical and scientific activities, achievements, and honors.

Nonscientific members of the public may serve on scientific and technical review committees when their expertise or experience is appropriate. Service on NIH advisory committees also demands mature judgment, balanced perspective, objectivity, and ability to work effectively in a group. Membership requirements also include a commitment to accomplish work assignments, assurance that the confidentiality of applications, proposals, discussions, and recommendations will be protected and certification acknowledging they are free from conflicts of interest.

OUR VISION

Members of the Southwestern Ohio Ambulatory Research Network (SOARNet) are committed to improving the health and welfare of children and adolescents.

OUR MISSION

Members of SOARNet collaborate within our unique collection of primary care practices (urban, suburban, rural, and military). We share new knowledge from our studies among network members and others. We aim to make important contributions that enable primary care clinicians to provide high quality, culturally competent care to their patients.
